

NeemahCouture Website

A modern, elegant website for NeemahCouture — a Nigerian fashion/couture house.

Features

- Responsive public site (Home, About, Gallery, Services, Contact)
- Filterable gallery with lightbox
- Contact form with WhatsApp integration
- Admin dashboard (upload designs, edit business info, view inquiries)
- Real backend via Supabase (auth, database, storage)

Deploy to GitHub Pages

1. Create a new GitHub repository
2. Upload all these files to the repo
3. Go to Settings → Pages → Source → select “Deploy from a branch” → select `main / root`
4. Your site will be live at `https://yourusername.github.io/repo-name/`

Supabase Setup (Required)

1. Go to supabase.com and create a free project
2. Get your **Project URL** and **Anon Key** from Project Settings → API
3. Replace them in `js/config.js`:

```
const SUPABASE_URL = 'https://your-project.supabase.co'  
const SUPABASE_ANON_KEY = 'your-anon-key'
```

Database Tables

Run these SQL commands in Supabase SQL Editor:

```
-- Designs table  
CREATE TABLE designs (  
  id UUID DEFAULT gen_random_uuid() PRIMARY KEY,  
  title TEXT NOT NULL,  
  category TEXT NOT NULL,  
  description TEXT,  
  image_url TEXT NOT NULL,  
  featured BOOLEAN DEFAULT false,  
  created_at TIMESTAMP DEFAULT NOW()  
);  
  
-- Business info table  
CREATE TABLE business_info (  
  id INTEGER PRIMARY KEY DEFAULT 1,  
  address TEXT,  
  phone TEXT,  
  whatsapp TEXT,  
  email TEXT,  
  hours TEXT,
```

```

    instagram TEXT,
    facebook TEXT,
    twitter TEXT,
    about_text TEXT
);

-- Contact submissions
CREATE TABLE contacts (
  id UUID DEFAULT gen_random_uuid() PRIMARY KEY,
  name TEXT NOT NULL,
  phone TEXT,
  email TEXT,
  style_interest TEXT,
  message TEXT NOT NULL,
  created_at TIMESTAMP DEFAULT NOW()
);

-- Insert default business info
INSERT INTO business_info (id) VALUES (1) ON CONFLICT DO NOTHING;

```

Storage Bucket

1. Go to Storage in Supabase dashboard
2. Create a new public bucket called **designs**
3. Set bucket policy to allow public read access

Auth Setup

1. Go to Authentication → Settings
2. Enable Email provider
3. Create your admin user manually or use the signup in admin page once

File Structure

```

├─ index.html      # Public website
├─ admin.html      # Admin dashboard
├─ 404.html        # Custom 404 page
├─ css/
│   └─ style.css   # Styles
├─ js/
│   └─ config.js   # Supabase credentials (EDIT THIS)
│   └─ app.js      # Public site logic
│   └─ admin.js    # Admin dashboard logic
